SUMMARY

Full Stack Developer with hands-on experience building production-grade web applications using React, Django, and REST APIs. Currently working on real-world accounting software used by business users. Strong in frontend-backend integration, database management, and deployment. Seeking an junior full stack role where I can grow and contribute to scalable products.

SKILLS ACQUIRED

Frontend: React, JavaScript(ES6), TypeScript, Tailwind, Shadcn,

Backend: Python, Django, Flask, NodeJS, ExpressJS, Rest API, Fast API

Database: MySQL, MongoDB, Firebase

Other: Git/GitHub, Vercel, Render

EXPERIENCE

System Engineer

Narayani Jewelers

Pakur, Jharkhand

Apr-2025 – Present

- Working on production-level accounting software used by real business users.
- Enhancing their in-house accounting software by adding a Feature which monitor Dues and remind
- Developed and implemented **new features using Django and Django REST Framework** to improve system functionality and user experience
- Managed and maintained databases using MySQL and MongoDB to **ensure data integrity and performance**
- Collaborated closely with accounting and operations teams to identify software requirements and deliver custom solutions

Junior Web Developer internship

HOTS

Remote

March 2025 – Apr 2025

- Developed responsive and interactive web applications using React, TypeScript, Tailwind CSS, and modern JavaScript (ES6) for seamless cross-device compatibility.
- Integrated advanced animations and scroll effects utilizing AOS, GSAP and Scroll Trigger to enhance user engagement and interface dynamics.
- Focused on performance optimization, applying best coding practices and oops concepts to ensure no unnecessary code and bugs clean code smooth user experience.
- Hands-on internship experience in full-cycle web development, from UI/UX implementation to performance tuning and backend functionality.

PROJECTS

AutpPpt.AI (React, TypeScript, Express, NodeJS, Firebase, Gemini AI, RestAPI,)

[Live Demo](#)

- Designed and developed an **end-to-end AI-powered presentation generation system** using **Node.js** and **Express.js REST APIs**, converting user prompts into structured, production-ready slide output.
- Built **secure backend services with authentication and request validation**, enabling controlled access to AI generation workflows and improving system reliability.
- Implemented **AI content processing pipelines** that transformed unstructured user input into **semantic, validated HTML-based presentations**, reducing manual slide creation time by **~80%**.
- Enforced **strict layout validation, box-model constraints, and deterministic rendering rules** to ensure consistent **16:9 (1024×576), iframe-safe responsive UI**, reducing layout errors by **~60%**.
- Architected a **scalable frontend-backend architecture** using **React, TypeScript, Vite, Tailwind CSS, shadcn/ui**, integrated with REST APIs, improving render performance and maintainability by **~40%**.

Digital Business Web App (React, Express.js, Mongodb, NodeMailer, Django, Firebase.)

[Live Demo](#)

- Developed a **modern, responsive business landing page** using **MERN** for seamless client experience and fast page loads and ease of maintenance

- **Contact form with API integration** (email service via Resender) **Interactive gallery or services filter** **SEO optimization** **Web analytics integration**
- Used **responsive design principles** to support mobile, tablet, and desktop layouts.
- Deployed the project to **Vercel** for global edge hosting and optimized performance..
- Added interactive elements and polished layout using **Tailwind CSS CSS Modules / Styled Components**.

Foody a Restaurant website (HTML, CSS, JavaScript, Python Django, and SQLite.)

[Live Demo](#)

- Built a **responsive restaurant website** using **HTML, CSS, JavaScript, Python (Django), and SQLite**.
- Designed an intuitive **user interface** showcasing the **menu, special offers, and contact details**.
- Enabled users to **browse dishes**, place **online orders**, and receive **real-time updates**.
- Utilized **Django for backend** development to manage data and ensure **secure handling of customer information**.
- Integrated **SQLite** for efficient **data storage** and retrieval.
- Delivered a seamless dining experience for users and robust **admin functionality** for restaurant staff.
- Demonstrated **proficiency in full-stack web development, database integration, and user-centered design**.

EDUCATION

Chandigarh University
Master Of Computer Application
Specialization in Artificial Intelligent and Machine Learning

Mohali, Panjab
Jul 2024 – Jul 2026
Cumulative GPA: 8.9/9.5

BSK COLLEGE OF BARHARWA
Bachelor of Commerce
Major in Accounting; Finance and Minors in Mathematics

Barharwah, Jharkhand
Aug 2020 - Nov 2023
Cumulative GPA: 7.45/9.5

ADDITIONAL

- **Certifications & Training:** AWS APAC's Solutions Architecture, **Web Designing** (Chandigarh University), **AI/ML** (Chandigarh University)
- **Awards & Curriculum:** Cultured Festival **Top 30 in 300+ Participants** (2018), Participating in Youth Festival Cycling marathon and **win agents 600+ participants**.
